We always have a very fun booth. For just \$3.00, a child or person can grab a cane pole with a line and a clip on the end and cast their line behind a curtain and win a stuffed animal. The look of anticipation and then excitement on children's faces makes it fun for all.

We would like volunteers to work a two hour shift on Friday night, or Saturday or Sunday.

**We especially need help on Saturday since Mary Jo and Dave Enneking need to attend a wedding.**

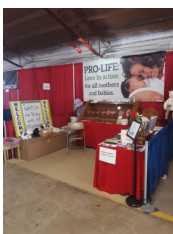

Please call 937-726-7299 to volunteer!!

**TREATMENT FOR ECTOPIC PREGNANCY IS NOT ABORTION,  
AND EVERY PRO-LIFE STATE ALLOWS CARE**

TAKEN FROM LIFENEWS.COM APRIL 18, 2024 BY DENISE HARLE

While *Roe v. Wade* was in effect from 1973 to 2022, more than 60 million innocent babies lost their lives to abortion. So when the U.S. Supreme Court finally reversed that disastrous and deadly decision in 2022 in *Dobbs v. Jackson Women's Health Organization*, it should have been a time to celebrate millions of lives being saved.

Pro-life advocates across America did just that, praising God for the babies who will now get to live thanks to the Court's decision. But radical pro-abortion activists, including abortion businesses like [Planned Parenthood](#), were furious.

Planned Parenthood and businesses like it rely on abortion for profit, and the Court's decision in *Dobbs* threatened their model. As a result, they launched a full-on disinformation campaign to try to scare people into supporting abortion. One scenario that pro-abortion activists immediately started mischaracterizing for their own gain was ectopic pregnancies.

*What is an ectopic pregnancy?*

An ectopic pregnancy is a life-threatening condition in which an embryo has implanted outside of the uterus, meaning it will not survive. According to the [American Association of Pro-Life Obstetricians and Gynecologists](#) (AAPLOG), survival of the mother in these cases "requires that the embryo either spontaneously or artificially die, or be removed."

About 2 percent of all pregnancies are ectopic, and slightly less than 3 percent of pregnancy-related deaths occur due to complications from ectopic pregnancies. An ultrasound can identify whether a woman's pregnancy is ectopic.
